

Top Ten Report - June 2024

Results from the June 2 Pasadena Senior Games (SCY), the June 1 RIPT Masters LCM Meet, the May 24-26 Speedo Grand Challenge hosted by NOVA, and the May 19 MVN LCM swim meets have been turned in.

Final SCY results for the 2024 season have been turned in to National. The season was extended thru the National meet in June (which is late on the calendar). Therefore the June 2 Senior games meet will be in the 2024 reporting season, not the 2025.

Please remember that if you have a swimmer with dual registration that you can only set USMS records at a USA Swimming meet unless you get a dual sanction or an observed status from USMS on the same meet. You cannot set an AQUA (formerly FINA) World record at a USA Swimming meet which is only sanctioned by USA Swimming. If the pool has not been included (measured or re-measured) in the USMS database, the times from a USA Swimming meet will go in the database but cannot be considered for rankings or T10.

Hosts, please remember that if you do not have a CTS printer hooked up, you will not get records submitted for a USMS/World Record. They do not accept printouts from inside Hy-tek as any decent admin or computer tech can change these times. Hook up your CTS printer!

Please everyone remember to submit split requests if there is the slightest possibility of setting a record or for Top 10. They must be done before the meet ends and cannot be submitted later.

As a reminder, all sanctioned USA Swimming meets are USMS Recognized and although FINA records cannot be set at these meets, times are good for Top 10 and USMS records. If you have a dual registered athlete setting T10 or USMS records at a USA Swimming meet, they must request the meet/times be added AND provide all the paperwork required INCLUDING pool measurements.

Paper meet information must be bundled and sent via trackable mail to the Top 10 recorder within 10 days.
